EDUCATION

Rutgers University–New Brunswick

New Brunswick, NJ

Bachelor of Science in Computer Science & Mathematics

Expected May 2027

- **Relevant Coursework:** Data Structures, Design and Analysis of Algorithms, Discrete Structures, Data Management for Data Science, Computer Architecture, Probability Theory
- **GPA:** 3.6
- **Honors:** Posse Foundation Full-Tuition Leadership Scholarship (2022–2027); Dean’s List – Fall 2024, Spring 2025, Fall 2025, Spring 2026

EXPERIENCE

IT Consultant → Level 2 IT Specialist & Assistant Supervisor

Oct. 2023 – Present

Rutgers University Office of Information Technology

Piscataway, NJ

- Oversee daily operations across 11 campus lab locations, serving as point of escalation for policy enforcement and service standardization
- Build semester-based staffing schedules that balance operational coverage with employees’ academic commitments
- Review applications and conduct interviews for incoming IT Consultants in Training, evaluating candidates from a 700+ applicant pool via Breezy HR
- Resolve 75+ escalated hardware, software, and enterprise system tickets weekly via ServiceNow and Five9, including secured connections, VPN, network, and printer/projector issues
- Monitor data center operations after hours, ensuring system availability and independently escalating incidents when the Help Desk is closed

McNair Scholar Research Intern

Summer 2025

Rutgers University – Biomedical Engineering Department

Piscataway, NJ

- Designed and executed tensile testing experiments on ligament analogs using an Instron 5869, evaluating stress-strain behavior across baseline, damaged, and treatment groups
- Analyzed tensile strength and modulus data to characterize mechanical performance differences between experimental groups

PROJECTS

Portfolio Website | *FastAPI, SQLite, HTML/CSS/JS, GitHub Pages*

2026

- Designed and built a full-stack personal portfolio site with a custom Windows 95-themed interface; backend built with FastAPI and SQLite, deployed via GitHub Pages
- Engineered responsive layout, centering, and readability across screen sizes, and implemented functional, fillable form elements while preserving the constraints of the retro desktop UI

Music Database | *Python, MySQL*

Spring 2026

- Designed a normalized MySQL relational schema (artists, albums, songs, users, ratings) for a Data Management for Data Science course project, applying foreign-key constraints and appropriate data typing to minimize redundancy
- Built the full Python/MySQL data layer, implementing functions to populate the database and answer analytical queries such as most prolific artists by year range, top song genres, and most-engaged users

TECHNICAL SKILLS

Languages: Java, C, Python, SQL, MATLAB

Frameworks/Tools: FastAPI, SQLite, MySQL, Git, GitHub Pages

Other: LaTeX, Lean 4

IT/Enterprise Tools: ServiceNow, Five9, Breezy HR
